(54) Title: **RECIRCULATING FLUIDIC NETWORK AND METHODS FOR USING THE SAME**

(57) Abstract: The present invention provides microfluidic devices comprising elastomeric components and solid substrate component for attaching ligands and methods for conducting a variety of assays and high throughput screening. The elastomeric components comprise a plurality of first and second flow channels forming a plurality of intersecting areas, further capable of forming looped flow channels, and in fluid communication with the solid substrate surface, a plurality of control channels, a plurality of first and second control valves, and a plurality of loop forming control valves.

Box III TEXT OF THE ABSTRACT (Continuation of Item 5 of the first sheet)

The abstract is too long (PCT Rule 8.1(b)). The abstract must be less than 150 words, or 200 words when no figure is to be published.

NEW ABSTRACT

The present invention provides microfluidic devices comprising elastomeric components and a solid substrate component for attaching ligands and methods for conducting a variety of assays and high throughput screening. The elastomeric components comprise a plurality of first and second flow channels forming a plurality of intersecting areas, further capable of forming looped flow channels, and in fluid communication with the solid substrate surface, a plurality of control channels, a plurality of first and second control valves, and a plurality of loop forming control valves.
